EXECUTIVE SUMMARY:

Working Group Charge: Review the current state of Biological Sciences PhD training at UW-Madison and make recommendations on the organizational structure and the delivery of highly competitive 21st century graduate education.

Statement of Need: While individual Biological Sciences PhD programs are reviewed every 10 years, there is no mechanism for reviewing the overall structure of bioscience graduate training. This process is critical to support both the research and educational missions of the university.

Working Group Members: David Eide, Zsuzsanna Fabry, Catherine Fox, Mary Halloran, Edward Jackson, James Keck, Ivan Rayment, Garret Suen, David Wassarman, Deneen Wellik (chair)

Implementation: The Working Group convened with its charge on May 7, 2019 and pursued the following processes to develop its recommendations:

- The Working Group met biweekly to discuss the results gathered, identify and prioritize issues that impact the effectiveness of graduate education, and develop recommendations.
- Dr. Wellik, with other committee members, met individually with directors of PhD programs and training grants to discuss strengths, weaknesses, and opportunities for their specific programs.
- Comparison data were solicited from peer institutions.
- The Working Group held three townhall meetings with program and training grant directors to discuss potential recommendations.

Major Findings:

- UW-Madison ranks last among more than 35 peer institutions in direct institutional funding of early-stage bioscience PhD trainees.
- Decentralized core training efforts in areas such as Responsible Conduct of Research/Ethics and Rigor and Reproducibility as well as professional development and career planning have led to a duplication of efforts and lost opportunities to maintain best practices in these areas for all graduate students.
- Administrative support varies widely among the programs and is low for many programs.
- The burden of data collection and assessment of program activities, which falls on faculty and staff, is a major obstacle to maintaining our competitiveness for NIH training grant awards.
- Programs separately conduct student recruitment, which duplicates efforts, creates a system that is difficult for prospective students to navigate, and limits the leverage provided by our research breadth in recruitment.

Recommendations:

- UW-Madison should establish the *First Year Wisconsin Experience in Biological Sciences* that funds and provides core training for all incoming biological sciences PhD graduate students.
- UW-Madison should provide financial support for directors and administrators of all PhD programs and training grants.
- UW-Madison should develop a centralized infrastructure for data collection and program and training grant assessment.
- Programs should work together to recruit students, while maintaining program autonomy.

Support for new investments:

- UW-Madison should financially support the *First Year Wisconsin Experience in Biological Sciences*.
- Graduate student tuition should go directly to the Graduate School Dean's office to support core training of students.
- Indirect costs generated by training grants should support administrative staff in the Office of Training Grant Support, which oversees data collection and program and training grant assessment.
- An endowment for training in the Biological Sciences should be established to increase financial support for graduate training beyond the first year.

I. INTRODUCTION

A. Charge of the Working Group

In May of 2019, Dr. William Karpus, Dean of the Graduate School, in sponsorship with Dr. Norman Drinkwater, former Interim Vice Chancellor for Research and Graduate Education and Dr. Cynthia Czajkowski, Associate Vice Chancellor for the Biological Sciences, convened a Working Group of ten investigators from within the Biological Sciences division for the purpose of reviewing the current state of PhD programs at the University of Wisconsin-Madison. The Working Group members and their roles at the UW-Madison are as follows:

David Eide, PhD: Professor, Department and Graduate Program Chair, Nutritional Sciences, Associate Director of Metabolism and Nutrition Training Program (T32)

Zsuzsanna Fabry, PhD: Professor, Pathology and Laboratory Medicine; Director, Cellular and Molecular Pathology Graduate Program (T32)

Catherine Fox, PhD: Professor, Department of Biomolecular Chemistry, IPIB Admissions and Curriculum committees, Genetics Admissions committee.

Mary Halloran, PhD: Professor, Department of Integrative Biology, Director, Neuroscience Training Program (T32)

Edward Jackson, PhD: Professor and Chair; Graduate Program Director, Medical Physics

James Keck, PhD: Professor, Biomolecular Chemistry; Associate Dean for Basic Research Training, School of Medicine and Public Health

Ivan Rayment, PhD: Professor, Biochemistry; Graduate Program Chair, Integrated Program in Biochemistry

Garret Suen, PhD: Associate Professor, Bacteriology; Program Director, Microbiology Doctoral Training Program; co-Director, Microbes in Health and Disease Training Program (T32)

David Wassarman, PhD: Professor, Medical Genetics; Graduate Program Director, Cell and Molecular Biology

Deneen Wellik, PhD: Professor and Chair, Cell and Regenerative Biology; Working Group Chair

Statement of Need:

*(from Project Charter delivered to the Working Group committee, **Appendix 1**)*

UW-Madison has 35 biological sciences PhD programs in 8 Schools/Colleges. The administrative structures, funding models and educational philosophy varies widely across the constellation of PhD programs. In January 2019, Drs. Catherine Fox and Christina Hull presented the Graduate School and the Office of the Vice Chancellor for Research and Graduate Education with a letter, signed by numerous (200) biological sciences faculty members, outlining the need to examine how graduate education is delivered and administered at UW-Madison. Although each program is required to be reviewed every 10 years, there is no coordinated effort to examine the overall organizational operational structure of biological sciences PhD programs. Given that the request for this examination came from the faculty as well as recent findings from the National Academies of Science, Engineering and Medicine in a report, “Graduate STEM Education for the 21st Century” (2018), we believe examining our structures and processes as a vibrant and modern PhD training enterprise is critical to the continuing education and research missions of the University.

*(Biosciences Faculty Letter of Concern attached in **Appendix 2**)*

Project Description:

*(from Project Charter delivered to the Working Group committee, **Appendix 1**)*

The purpose of the Working Group is to review the current state of biological sciences PhD programs at the University of Wisconsin-Madison and to make recommendations with respect to organizational structure, delivery of 21st century graduate education and program and PhD student funding. Through engagement with stakeholders, the Working Group is charged with gaining insight into the UW-Madison biological sciences graduate program enterprise, identifying strengths and weaknesses in organizational and operational structure and making recommendations for solutions.

B. Working Group Process

1. Developing queries:

The Working Group used the first two meetings to develop a strategy to gather data from our broad and diverse array of 35 PhD programs and 24 T32 training programs. Our ten Working Group members represent only a small subset of programs in this space and thus our priority was to ensure that we gathered information from as broad a pool as

possible. Towards this end, we developed a questionnaire outline that was designed to gather basic information about each program and polled each director regarding perceived strengths, challenges, and obstacles of their programs. (See Questionnaire Outline in **Appendix 3**). The questionnaire was designed to be open-ended and allow ample room for discussion. The Working Group decided that one-on-one meetings with the program directors would provide the most meaningful information and would establish a communication bridge to all programs that were willing and able to schedule a one-hour meeting to discuss this topic. Dr. Wellik, the chair of the Working Group, attended every meeting for continuity. Meetings were scheduled at the PI/Director offices and included 1-2 additional Working Group members (scheduling conflicts resulted in occasional meetings where only Dr. Wellik was present).

2. Individual Meetings with each PhD and T32 program director:

Meetings with 23 PhD program and 15 T32 directors took place between May 31 and August 1, 2019 (see **Appendix 4** for a list of meeting attendees). In some cases, the directors and associated administrative and leadership personnel from their respective programs attended the meetings. Since the meetings were sequential (with generally only one per day being scheduled), later meetings included some conversations regarding common obstacles and potential solutions.

3. Collect data from peer institutions:

The Working Group recognized the importance of assessing our graduate training with respect to our peers. Two strategies were employed to gain knowledge in this area. First, we distributed a formal questionnaire that sought extensive, detailed data on training in the biological sciences. The University of Michigan, UNC-Chapel Hill, and UC Berkeley answered this questionnaire. Later, the Working Group used their professional connections at other institutions to poll on just a few questions, the most important of which was considered to be the level of direct financial support the institution provided for graduate trainees. Findings from these inquiries are included in later sections of this report.

4. Aligning on potential solutions:

From June through August 2019, the Working Group met biweekly to discuss information as it was being gathered, discuss and attempt to build consensus on the most pressing issues for which we could offer potential solutions, and draft working recommendations to present to broader program leadership. The goal was to make a small number of key recommendations with the potential to elicit the biggest positive impact for the broadest community of learners and investigators. In addition, given the strong legacy and pride of individual PhD programs, we sought solutions that would maintain the strong identity and autonomy of each program.

5. Present potential solutions to director group:

In late August through mid-September of 2019, the Working Group held three widely advertised meetings with graduate program and T32 program directors at three locations on campus. During each of these meetings, an outline of the Working Group's potential solutions was discussed. Again, these meetings were iterative and resulted in further modifications to the Working Group's recommendations to ensure the broadest benefits to programs while preserving program autonomy. (Of note: the issue of program autonomy arose repeatedly as the most anxiety-arousing issue in discussing recommendations for change.)

6. Finalizing report:

The Working Group held two meetings to discuss an outline of recommendations, the topics to be covered in the report, and assignments among the Working Group for drafting sections of the report. Three weeks prior to the report due date, the draft was uploaded on a shared drive for one week and the Group made collective comments and edits on the draft. The final two weeks were spent finalizing the report and modifying proofs. The final result is this document.

C. Strength of Bioscience Training at UW-Madison: Historical Impact and Current Contributions

The rich legacy of UW-Madison PhD graduates in the biological sciences; major discoveries driving entrepreneurship and the Wisconsin Idea

PhD student research in the biological sciences at the University of Wisconsin-Madison has led to new discoveries in medicine and agriculture that have changed the nation and the world. The remarkable and sustained positive impact that UW-Madison bioscience research has contributed to the economy, well-being, and international stature of the state of Wisconsin is incontestable. As one example, Harold A. Campbell, as a graduate student with Karl Paul Link, was

instrumental in the discovery of the precursors to Warfarin. As another, Hector F. Deluca, throughout his time as a graduate student with Harry Steenbock and his independent career as a faculty member at UW-Madison, made breakthrough discoveries in Vitamin D research. In addition to improving the health and quality of human life across the globe, these PhD student-driven discoveries contributed profoundly to the endowment that supports education and research at UW-Madison to this day. Warfarin research generated an estimated \$13.7 million (\$218 million adjusted for inflation) while Vitamin D research generated \$608 million as of 2015. In recent years, UW-Madison PhD graduate students have supported the development of vigorous biotechnology enterprises in Wisconsin and throughout the nation including Promega, Cellular Dynamics International, Deltanoid, Lucigen, Roche Nimblegen, and others (**Appendix 5**).

It is also critical to note that many of our PhD graduates have gone on to hold leadership positions in both academia and industry. Academic leaders include Gunter Blobel, PhD (Oncology, 1967), who was a Professor at Rockefeller University and a Howard Hughes Medical Institute Investigator and was awarded the Nobel Prize in Physiology and Medicine in 1997. More recent exemplars in academia include Julie Ahringer, PhD (Cell and Molecular Biology, 1991), a Wellcome Trust Senior Research Fellow serving as the Director of the prestigious Gurdon Institute at the University of Cambridge, UK. Even a far-from-complete list of PhD graduates from UW-Madison's biological sciences programs over the last 30 years is spectacular (**Appendix 5**). In industry, successful examples are also countless. For example, Dr. Robert Reiter, PhD (Plant Breeding and Genetics, 1989), is currently Head of Crop Science Research & Development at Bayer Global. Dr. Jack Newman, PhD (Bacteriology, 2001) is co-founder of Amyris. The legacy of UW-Madison's internationally renowned graduate programs in the biological sciences has allowed our institution to flourish in multiple disciplines and has enhanced the prosperity and quality of life in the State of Wisconsin and well beyond our borders, a defining feature of the Wisconsin Idea.

D. Bioscience PhD Training Nationally; Comparing UW-Madison to Our Peers

While UW-Madison can boast tremendous success in the quality and quantity of PhD graduates in the biological sciences, we now face an unprecedented level of competition from peer and near-peer R1 universities. Given that extramural research grants from funding agencies such as NIH and NSF are awarded on a competitive basis and subject to intense peer review, the competition for PhD students directly affects our research competitiveness and economic stability. Currently, UW-Madison is training 1,300 biological science PhD students enrolled across 35 programs. UW-Madison has graduated more doctorates in the biological sciences than any other university in the US, which helps explain why UW-Madison PhDs can be found at most institutions across North America. While these data suggest that UW-Madison biological sciences graduate programs are robust, there are clear signs of decline. In particular, the number of NIH training grants, as well as the number of funded positions on those grants, has decreased dramatically over the past ten years, yet the number of training grant positions awarded by the NIH during that same period has remained stable. Thus, competing universities have gained training grant slots, which are both a measure of research training prestige and an important financial multiplier of research awards, at our expense. While UW-Madison previously ranked among the top three in the total number of training grants and could boast that it had more training grant positions than any other university, we currently rank eighth nationally. We argue that it is no coincidence that our decline in training grant support has coincided with our decline in grant award dollars from the federal government and ***our ability to attract and generously support the strongest PhD students is essential to drive research productivity and innovation in many fields within the broad biological sciences division.***

Recognizing a need for innovation and investment in PhD student education in the biological sciences for UW-Madison to maintain research competitiveness

A major goal of the Working Group was to examine the reasons for UW-Madison's decline in bioscience graduate education as a first step toward halting, and hopefully, reversing this disturbing trend. Towards this end, we have examined how our peer institutions are dealing with national trends in PhD training initiated at the NIH, emphasizing peer universities that have maintained or gained research and PhD training success and prestige during the same period of time that the UW-Madison has experienced declines. One major finding is that many of our competitors, both public and private, have proactively developed strategies to provide stipends for all of their incoming bioscience PhD students for their first and, in many cases, a portion or all of their following years, relieving pressure for such funding from extramural research grant dollars. This type of support is critical for two reasons. First, while PhD students are the primary research productivity engines in many biological research disciplines, they are generally less productive in their early years because much of their time is devoted to classroom learning, achieving specific dissertator requirements, and

preparing for qualifying exams. Second, a major factor considered by NIH committees reviewing training grant applications under the new requirements is ***institutional support*** for PhD student education. That is, reviewers are directed to judge whether and how robustly the applicant institution supports their PhD students. A simple and obvious feature to credit is a fully-funded first-year of NIH-mandated training and laboratory training experiences (known as rotations). Thus, early institutional support greatly enhances our ability to compete successfully for training grants, which in turn further enhances PhD student education while simultaneously increasing the amount of extramural research dollars that can be spent on research productivity.

We also endeavored to obtain more detailed data from peer institutions concerning the mechanisms used to provide for stipend support, in admissions and recruiting, and in supporting faculty in preparing training grant applications and various other critical aspects of graduate education. We received fairly detailed responses from three peer universities: the University of California-Berkeley, the University of Michigan, and the University of North Carolina-Chapel Hill. While the precise mechanisms vary for each of these institutions, they have each established admission and recruiting practices that are substantially more coordinated and cohesive than what we currently have at UW-Madison. In addition, they have all found ways to support the first year of open rotations across a wide swath of biological sciences laboratories (providing robust, cross-disciplinary opportunities is a key goal of the new guidelines for training biological science PhD students outlined by the National Academy of Sciences). Moreover, these universities have centralized administrative support and expertise essential for meeting the new training grant requirements. For example, at UC-Berkeley, admissions and recruiting, first-year rotation experiences, and PhD-training grant support is centralized by simply parsing all biological sciences disciplines into only two major administrative departments: Integrative Biology or Molecular and Cell Biology. The University of Michigan, like UW-Madison, has many individual PhD programs in the biological sciences, but uses a coordinated admissions and recruiting mechanism, called Program in the Biomedical Sciences, that allows for one year of open, fully-funded rotations, with students making commitments to a specific PhD program then applying for a positions on training grants most relevant to their chosen thesis project. The University of North Carolina-Chapel Hill instituted an Office of Graduate Education (OGE) dedicated to the biological sciences and a first-year PhD training program that includes a fully funded rotation year, training experiences and courses that meet NIH standards. As is the case for the University of Michigan, PhD students commit to specific graduate programs and apply for training grant positions at the end of their first year. UNC-Chapel Hill is particularly noteworthy as its national rankings in federal research dollars have increased substantially since its OGE was established in 2008. This OGE includes an Associate Dean who serves as director and nine PhD-level administrators with expertise in diversity and inclusion, training grant applications and support courses, data storage and analyses, mental health support for PhD students, and career development support.

A major challenge we now face in training PhD students in the biological sciences is that their stipends, fringe benefits, and tuition costs have increased while grant funding has remained comparatively flat. While some administrators suggest a stronger investment in postdoctoral support initiatives for the biological sciences as opposed to PhD-education initiatives, the Working Group argues strongly against this idea. UW-Madison has a rich historical legacy of being a spectacular graduate training environment. This legacy places us in a strong position to compete for the best PhD applicants and reverse the decline that we have experienced recently. In contrast, we do not have the same rich legacy as a postdoctoral training institute and, while some laboratories and disciplines within the biological sciences recruit strong postdoctoral associates, many cannot. Some of the reasons for this are historical, but some are simply geographical and difficult to overcome.

II. FINDINGS

A. T32s: Strengths, Challenges, Obstacles

STRENGTHS:

NIH training grants have played a foundational role in graduate education at UW-Madison since the mid-1970s. Funds from T32s and related T-series awards (TL1, T15, and T35) have driven significant changes in graduate student experiences, including an expansion of cross-disciplinary training and enhancement of professional training in areas such as responsible conduct of research. UW-Madison has historically enjoyed high levels of NIH training grant funds.

CHALLENGES AND OBSTACLES:

Compliance demands and competitor responses: NIH agencies have greatly increased requirements in trainee education over the past decade that have affected training and research. In a recent example, NIGMS (the largest provider of NIH T32 funds) released a revised T32 FOA in 2017 that fundamentally changed their recommended approach to training in the biosciences. This change, and others that have preceded the 2017 FOA, have elevated the administrative, training, and compliance requirements for training grants. This increased burden has fallen on training grant PIs and administrative staff who have little support. This, in turn, has made retention and recruitment of training grant directors on our campus much more difficult.

Training grants come with a number of unique and challenging administrative burdens that require sophisticated grants expertise. Until very recently, UW-Madison has relied on the community of training grant directors and staff to address compliance questions through an *ad hoc* arrangement that depended heavily on volunteers who took time away from their primary duties to help. To help centralize expertise in T32 support, the UW School of Medicine and Public Health launched the Office of Training Grant Support (OTGS) in March 2019 and recruited an experienced full-time associate director to help training grant directors and administrators in meeting NIH compliance expectations. The OTGS has already assisted multiple training grants on campus but needs to be expanded and further developed to reach the level of support that the Working Group deems is needed for a robust training grant environment.

At the same time that the administrative burden of training grants has increased, other universities have increased their investment and support for training grant efforts and have outcompeted UW-Madison for funding. Over the past ten years, UW-Madison has lost nearly \$2,700,000 in annual training grant support (15%) and 13 of our training grants (26%) (**Appendix 6**). Notably, 2018 marked our lowest number of training grants on campus in a decade. The erosion of training grant funds has also occurred as tuition and student and postdoctoral stipends have increased, meaning that the buying power of each grant dollar has been further reduced by inflation. In many instances, training grant efforts at our peer institutions have been catalyzed by sophisticated centralized support offices that manage the large data-reporting demands of training grant applications among other services. The UW-Madison OVCRGE has pledged to support, in coordination with the OTGS, creation of a functional trainee/trainer database to assist with training grant data tracking and grant submissions. ***The Working Group applauds this collaboration and believes that to remain competitive for extramural funding and continue to lead the nation in bioscience training, UW-Madison needs to continue building solutions that meet our training grant infrastructure demands.***

B. PhD Programs: Strengths, Challenges, Obstacles

STRENGTHS:

The initial meetings conducted by the Working Group revealed the enormous breadth and complexity of PhD training in the biological sciences at UW-Madison. There are large differences in the sizes of the programs (both number of students applying and matriculating) and in the support they receive (particularly administrative). Despite the breadth of these programs, there were a few key areas in which there was enormous agreement. First and foremost, ***all programs stated an unequivocal commitment to teaching and training at the highest level of scholarship and consider PhD students to be the engine that drives interdisciplinary research at UW-Madison.*** This opinion was stated at every meeting, by every director, in many forms.

Education is an important mission that UW-Madison serves in the State of Wisconsin. The combined PhD programs in the biological sciences confer more than 250 PhDs each year and, as described above, our alumni populate the ranks of every major institution in this country, are principals at innumerable local and national biotechnology companies,

serve in leadership roles across a huge swath of corporations, and serve in many government positions, editorial roles as well as at foundations and outreach programs. These individuals are proud alumni of UW-Madison and their representation in diverse industries is an outstanding service to the state.

Further, the *interdisciplinary nature of PhD training* serves as a major catalyst of interaction across departments and programs. From graduate student relationships with one another within programs, the committees they form for their dissertation work, and the internal and external seminars where students and their PIs interact with others in their field, interactions are often established in the context of PhD training. A model in which postdoctoral fellows or technician/scientist-level lab personnel are the primary researchers in a laboratory would greatly diminish this catalyst and lead to increased isolation of researchers. ***From the most highly supported programs to the most severely under-resourced, all program leaders were overwhelmingly and consistently supportive of maintaining a strong presence in graduate training.*** In addition, all echoed the critical importance graduate students play in driving the strongest research at the university.

CHALLENGES AND OBSTACLES:

There were a significant number of challenges and obstacles noted by individual programs, and the breadth and different funding models that support various programs in the biological sciences accounted for some of them. However, the major common obstacles were insufficient administrative support, lack of graduate student funding support (especially for the first year of training), inadequate centralized training and skills development resources, and recruiting challenges.

For administrative support, the degree to which programs receive support, including administrative support and salary effort or other incentives for directors, was widely variable and not proportionate. For programs that had little or no support for their programs, inadequate support was strongly noted as an obstacle, making it increasingly difficult to convince PIs to give of their time as directors. For PIs committed to maintaining extramural research funding in this competitive climate, taking on this time-consuming responsibility of a directorship in the absence of adequate support is draining and risky. Notably, programs that have a high degree of support uniformly extolled how critical this support is for maintaining a strong program (as well as for their own research program).

A pressing concern that many programs reported was the need for centralized support for students, such as resources for training in important activities related to Responsible Conduct of Research/Ethics, Rigor and Reproducibility, and other training and career development services. Notably, some programs have made outstanding contributions to developing training in some or all of these areas, but they have been the result of individual contributors. Thus, there are many programs duplicating efforts. These redundant activities are a significant drain of limited resources and are undermining the overall strength of our training capacity. Further, we are falling far behind our peers in offering skills development workshops in important areas such as scientific writing, preparing CVs, and giving job talks. Likewise, centralized career development activities are considered inadequate.

A major concern that arose in all discussions and that stood out in comparison to our peers was the lack of institutional funding for first-year (and beyond) bioscience graduate students. To date, we have gathered information from 38 peer institutions and we rank LAST among them in institutional funding for early training support (Table I). Every one of our peer institutions polled supports at least the first year (rotation period for many programs) of bioscience graduate training. UW-Madison instead relies on the PI's lab, departmental funds, or training grant dollars, often prior to the student formally joining a laboratory. ***This stark support differential directly impacts our research competitiveness and reduces the value of our research grant dollars and training efforts relative to our peers.*** This financial burden also leads to indirect negative consequences that include individual programs being less coordinated in admissions and recruiting. As a result, many programs are losing outstanding prospective graduate student candidates to our peer institutions that offer more expansive rotation opportunities and centralized supporting activities for graduate training.

Table I.

Institutions	Institutional Funding for PhD Students
Baylor School of Medicine, Houston, TX	1.5 years
Berkeley	2 years
Brown University, Providence, RI	1.5 years
Brandeis University, Waltham, MA	2 years
Case Western University	2 years (undergrad campus, w/ TAs); Med School: first year
Cold Spring Harbor Laboratories	all years (4-5 years)
Cornell University	first year
Duke University, Durham, NC	first year
Harvard University	2-3 years (depending on program; 6 years for for Evol Bio with TAs)
Johns Hopkins University	one year
MD Anderson	1.5 years
Michigan State University	first year
Northwestern University	1.5 years
Penn State	first year
Purdue University	first year (30 slots)
Stanford University	4 years
Tufts	first year
University of Alabama-Birmingham	1.5 years
University of Arizona	first year (TAs and/or institutional funds)
University of California-San Diego	first year
University of California-San Francisco	2-3 years (depending on gift/endowment dispersal)
University of Chicago	first year
University of Cincinnati	first year (only through Feb when rotations end)
University of Colorado-Denver	first year
University of Iowa	first year
University of Kentucky	first year
University of Maine	first year
University of Massachusetts	first year
University of Michigan	first year
University of Minnesota	first year
University of North Carolina	first year
University of Pennsylvania	2 years
University of Pittsburgh	first year
University of Southern California	first year
University of Utah	first year
University of Washington	first year
Vanderbilt University	first year
Washington University	1.5 years

Regarding recruitment, we have noted that our current decentralized approach creates challenges for bringing outstanding biological sciences graduate students to UW-Madison. Although prospective students are allowed to apply to up to three programs in a single application, strong candidates are often required to attend multiple recruiting weekends if they want to examine each program. These multiple visits waste resources for the university and valuable time for a candidate who is often still taking a full course load and interviewing at peer institutions. It also gives savvy students the incorrect impression that UW-Madison may not be as collegial as it advertises or as organized as peer institutions. It should be noted, however, that because programs are funded individually for recruitment and because rotations are not covered through a central mechanism, there exists a strong economic incentive for individual programs to remain siloed in their approach to admissions and recruiting. While all programs are fiercely protective of maintaining academic ownership of their programs, which is a strength of such a large and broad training enterprise, the inability to coordinate admissions and recruiting is a missed opportunity that places us at a disadvantage. Coordinating these activities, ideally across all programs in the biological division but minimally between programs that share prospective students' interests, is being accomplished by our peer institutions and not at UW-Madison, serving as another obstacle to attracting more of the best and brightest to the university.

III. RECOMMENDATIONS

A. Overall Improvement of Graduate Experience

The Working Group recognized a major obstacle facing research and graduate education in the biological division is the lack of direct institutional support for graduate students and for graduate education compared to our peer institutions. This shortfall threatens our ability to recruit top graduate students and to provide continued high-level graduate training. Further, the increased financial burden on PIs results in diminished purchasing power of federal grant dollars relative to our peers. In response to this challenge, the Working Group recommends the creation of a new **“First Year Wisconsin Experience”** for bioscience PhD students at UW-Madison. The *First Year Wisconsin Experience* will alter the educational landscape for trainees by offering centralized support for at least the first year of training and by creating newly shared experiences to enhance peer networks that form the foundation for interdisciplinary research. Moreover, this new approach will create efficiencies that will elevate best practices in bioscience training for all of our students. We also note that, with centralized funds for early-stage bioscience graduate students, many programs that are currently “competing” for students may realize that they will be better positioned to recruit top students by working together and offering open admissions and rotation opportunities in aligned programs.

B. Recruitment/Training

The Working Group strongly recommends that the recruitment process for graduate programs be overhauled. The objective of this recommendation is to more efficiently and effectively recruit the best graduate students, while maintaining existing benefits, identity and autonomy associated with individual programs. Because several graduate programs (e.g. CMB, IPIB, Genetics, NTP, and MDTP; Plant Breeding and Plant Genetics, Plant Pathobiology, Horticulture, and Botany) have similar recruiting schedules and often share prospective students, there is a strong opportunity to have coordinated recruiting events. We expect that coordination would increase our ability to recruit top students because these students will be attracted by the breadth of bioscience research and expertise on campus and the energy and sense of community generated by the large number of prospective students involved. The flexibility such events will provide will aid students in identifying the program and faculty that best fit their professional development needs and interests. Coordinated recruiting events should also reduce the workload for faculty and staff as well as reduce the cost of recruiting and eliminate the need for multiple visits to campus.

The large number of individual departments and PhD training programs is a strength in terms of breadth of expertise and education opportunities, and these programs are held dear by faculty. However, there is an opportunity to consolidate similar programs into divisions or sub-disciplines that preserve the autonomy and history of training programs, while consolidating administrative efforts in both recruitment and training. It is critical, however, that each PhD training director receive salary/effort support for her/his effort (10% is common among peer institutions).

There will continue to be instances where programs may become obsolete and existing review plans should continue to be used to make institutional decisions when mergers or sunseting occur. These reviews should include external expert reviewers in addition to internal experts to permit the institution to make the best decisions to maintain vibrant and impactful PhD programs.

C. Enhancing the PhD Training Experience

In a new model the Working Group envisions, the *First Year Wisconsin Experience* will be available to all incoming bioscience PhD students and will include:

- Centralized introductory training in Responsible Conduct of Research (RCR). Currently, RCR training is distributed across many courses that redundantly tap subject-matter expertise and require significant faculty time. We recommend centralized RCR training that is based on the model currently in use by several programs in the School of Medicine and Public Health. In this model, the centralized course will provide a minimum of ten hours of lectures covering all NIH-required RCR topics. These topics will include lectures on animal welfare, collaborative science, conflict of interest and commitment, data acquisition, management, sharing and ownership, protection of human subjects, mentor/trainee responsibilities, publication practices, responsible authorship, peer review, research misconduct, and societal and environmental impacts of scientific research. In

addition to these lectures, discipline-specific breakout discussion groups organized by individual PhD programs, T32s or integrated between programs with similar interests will meet to probe specific cases related to the main lecture topics. An advanced course could be created for the fourth year, as mandated by NIH/NIGMS standards.

- Centralized training in Rigor and Reproducibility. In light of new NIH requirements for training in Rigor and Reproducibility, we recommend creation of a centralized course modeled after the RCR approach. Lectures might cover concepts such as cell line and animal authentication by genotyping; quality controls for animal research, including biological variables and acceptable group sizes; quality controls for disease models such as stroke research; quality control of reagents, including antibodies; quality control for protein assays, including Western blots and immunohistochemistry; quality controls for molecular biology, including shRNA knockdown procedures, and RNA-seq; and big data analysis, including statistics. Additional group discussions and workshops will be program specific and organized by individual PhD programs, T32s or integrated between programs with similar interests and needs.
- Centralized and supported Professional Development: A lecture series to explore diverse careers and to help develop professional skills such as communication (verbal and writing), interviewing, team science/collaboration, and leadership skills is recommended. Additional group discussions and workshops will be program specific and organized by individual PhD programs, T32s or integrated between programs with similar interests and needs.
- Centralized support for mentoring and advisory skills, mentor/mentee or advisor/advisee relationship and networking opportunities and goals for successful professional careers. This will be implemented by outstanding local resources and/or through lectures and additional group discussions and workshops organized by individual PhD programs, T32s or integrated between programs with similar interests and needs.
- Salary/Effort support for the Program Director. Directors are responsible for all aspects of a program, including overseeing curricular and recruiting activities, handling issues that arise with students and faculty trainers, and improving the academic program through the development of new initiatives. Currently, most directors do not receive salary support for these activities, despite the fact that program activities can often involve extensive time (often more than 10 percent of their effort). It can be difficult to attract the most highly qualified faculty to serve as directors and for directors to prioritize program activities over other activities in their schedules. Student services coordinators manage the day-to-day operation of programs in support of prospective students, current students, alumni, and faculty trainers. In our interviews with program directors, there was uniform agreement that the student services coordinator is critical to the success of a program; yet, the amount and the source of support for student services coordinators varies considerably among programs. Because of this wide disparity of funding amounts and sources, we recommend that student services coordinators receive defined salary support from central resources. Due to the broad impact that directors and student services coordinators have on graduate education, we expect that salary support for these positions will translate into increased recruitment, retention, and productivity of students and faculty.

D. Training Grants

UW-Madison NIH training grant programs advance innovation in the overall graduate student experience. They are also critical for funding graduate student and postdoctoral research and for elevating the institutional reputation of UW-Madison. In recent years, the NIH has emphasized that funded training grant programs must demonstrate strong institutional support to meet the growing demands for modernizing research training that prepare trainees for a range of careers in the biomedical research workforce. The OTGS is working in partnership with the Graduate School and OVCRGE to create a centralized infrastructure for supporting NIH training grant program success. The creation of OTGS represents a vital and timely investment and commitment to support UW-Madison training grant programs. It also provides an opportunity to ensure the development of robust structures that will enhance training grant excellence and enrich the landscape of research training at UW-Madison. To demonstrate UW-Madison's proactive approach to cultivate, innovate, and serve as a national model for graduate training in the biological sciences (that is also in line with NIH training grant funding obligations/expectations), we recommend:

- The OTGS should be expanded to centralize NIH-mandated components of training grants training for all trainees in the biological sciences in the areas of responsible conduct of research and scientific rigor and reproducibility. We recommend that this expansion be funded by channeling a portion of the indirect costs from training grants (mandated at 8%) to the OTGS. This expansion will facilitate:
 - Use of developed rigor and reproducibility courses from campus and NIH training modules (<https://www.nigms.nih.gov/training/pages/clearinghouse-for-training-modules-to-enhance-data-reproducibility.aspx>) to centralize rigor and reproducibility training for early-stage biological sciences graduate students.
 - Centralization of developed responsible conduct of research training for early and advanced trainees.
 - Development of evidence-based evaluation and assessment plans/templates for responsible conduct of research and scientific rigor and reproducibility training.
 - Other NIH-mandated components organized by the Graduate School should be evaluated and further developed: individual development plans (IDPs), and career development support (e.g. expand the Graduate School's Professional Development office to include career development).
- Provide support for Training Grant Directors, in recognition of significant (and increasing) efforts, to include:
 - 10% salary support.
 - Protected time commensurate with this activity.
 - Administrative staff support.
- Ensure training continuity by establishing a formal process for securing bridge funds in the event of a training grant funding lapse. This process could include a formula where costs are shared among the OVCRGE, the School/College that administers the given training grant, and departments that support trainees.
- Continue the OTGS and OVCRGE collaboration in development of IT tools for trainee/trainer tracking and standardized data collection:
 - Create a data clearinghouse for use by all NIH training grants on campus. This tool would be used for program evaluation, trainer review, grant development or renewal preparation and progress reports.
 - Create IT tools and processes to gather necessary institutional data for application submission.
- In recognition of the importance of mentor training, centralized mentor training using UW-Madison resources (CIMER and WISCIENCE) should be supported:
 - Tap nationally recognized training resources in CIMER to develop a campus-wide strategy for mentor training delivery and continued quality improvement for training. This will require funds for trainer/staff time and training evaluation and would build a foundation for a long-term UW-Madison/CIMER partnership.
 - Provide master facilitator training using CIMER methodologies.
 - OTGS could help to facilitate creation of campus guidance for remediation and removal of faculty displaying unacceptable mentorship qualities from training/graduate programs.
 - OTGS could develop tools for tracking mentor-training compliance.
- Integrate evidence-based approaches to evaluate and assess graduate training programs.
 - Provide survey tools developed for graduate training programs and invest in third-party tools to perform outcomes analysis. These should fit with the NIH demands for evidence-based evaluation and assessment.
 - Create guidance document to outline how programs can use feedback to improve program and their outcomes.

E. Expected Outcomes

Incorporation of ideas presented here, particularly implementation of the *First Year Wisconsin Experience*, would lead to:

- Increased intellectual freedom and autonomy for students in selecting rotation subjects and laboratories in programs that decide to jointly recruit students, which would lead to enhanced student recruitment and retention.
- Increased faculty research productivity, optimizing better utilization of research grant dollars, and enhancing competitiveness for training grants and fellowships due to reduced redundancy of faculty effort.
- Enhanced recruitment and success of new UW faculty who rely on graduate student-fueled research and who are eager to train graduate students.
- The creation of an inclusive, equitable, and cohesive environment that can improve chances for academic success. With more focus on centralized activities, instructors and subject-matter experts will have the time to create and apply best practices for delivery of RCR and R&R training.
- Learning and applying professional and ethical standards across all disciplines, which will lead to principled and ethical research with the greatest impact on research output and society.
- Adaptation of rigorous standards of investigation to conduct the most meaningful research that will lead to increased acceptance from society and greater research funding.
- Adaptation to the changing job market in the field of biological sciences, and greater success in career exploration, preparation and pursuing careers within or outside of academic research.
- Excellence in mentoring and advising will help graduate students navigate graduate school and adapt more easily to graduate life. This will support graduate student well-being.
- Greater interactions among graduate students. As graduate students are often drivers of interdisciplinary research, this will lead to new collaboration and discovery.

IV. SUPPORT FOR INVESTMENTS

The Working Group recognizes that the changes it deems necessary to maintain our competitiveness in today's research environment will require an investment of resources. We have identified potential solutions for reinvestment as follows:

A. Training Grant Indirect Costs

Training grants currently are awarded 8% in indirect costs. For the training grants that are currently awarded at UW-Madison, this amounts to ~\$1,090,000 per year. The institution now permits the PI of each training grant to request 2.5% of the 8% to be returned to the PI to support her/his program, a return which directors find valuable. We recommend that the remaining indirect dollars be used to support expansion of the Office of Training Grant Support and to expand mentor training efforts. These funds would allow additional staff and support for the critical needs for data collection, program assessments, and the generation of tables and information for non-competing and competing renewals. This model would not require new money to be generated, but rather to have the finances follow the need for support in this area.

B. Tuition

The Working Group considered this area to be a primary recommendation for consideration by the institution. Tuition is charged for each graduate student and is collected for the purpose of teaching and training the student. Whether paid from a federal grant or provided as a waiver for TA-ships (where the institution gains the service of that graduate student in teaching classes, most commonly to undergraduates who have paid their own tuition for this service), it is critical that these funds be allocated more directly to graduate student training. Unlike undergraduate instruction that takes place primarily in the classroom, the majority of the teaching and training of a graduate student is performed in their PI's laboratory, space that is modeled to be cost-recovered by the PI's funding and is largely directed by the PI in the performance of carrying out the research funded by her/his external grants. The Working Group considers it critical that this funding be distributed in a model that takes into account this education and training mechanism. For instance, many (most) PhD students train in interdisciplinary programs and their laboratory-based training occurs in the laboratory of a PI that is often not in the same department or school as the PhD Program Director. Under the current model, the PI is paying the student's tuition, stipend, and is additionally recovering direct and indirect dollars to support the student's research as the primary means of their training. For many programs, the PI begins paying these amounts even during the rotation period where the prospective student is spending time to evaluate the laboratory.

C. Endowment for Graduate Training in the Biological Sciences

In evaluating mechanisms other institutions have used to provide support for graduate training, the Working Group found that they have invested significant development efforts to build an endowment for this purpose (examples include Stanford, Michigan, UCSF). As the size of UW-Madison's combined programs are a strength, the Working Group, aided by Dean Karpus's office, obtained a list of PhDs awarded in the biological sciences since 1979 and note that there are more than 7,500 graduates, representing a pool of highly-achieving professionals who, like many undergraduates, have high allegiance to UW and all that it represents (**Appendix 7**). While there is high development activity directed at undergraduate alumni, the Working Group asserts that alumni often resonate with the institution from which their terminal degree is earned (as is recognized for MDs, for instance). Thus, our pool of PhD alumni represents a population with whom there is an opportunity to begin communicating and exploring as a potential area for development activities. The Working Group recognized that this could only be part of a long-term solution but fully support this idea and offer any continuing help in this area. (Of note, four of our ten-member Working Group are UW-Madison PhD alumni!)

V. CONCLUSION

In conclusion, the Working Group unanimously supports continuing strong and healthy PhD biosciences programs that train our students for careers in the 21st century. We unanimously recognize the importance of graduate training in the biological sciences to support a growing industry in Wisconsin, for the purpose of this institution remaining a national leader in PhD education, and to maintain the institution's research strength for which graduate students have always, and continue, to play a critical role.

Appendix 1

Project Charter

Graduate School
UNIVERSITY OF WISCONSIN-MADISON

Project Charter
Biological Sciences Graduate Program Workgroup

Project Name	Biological Sciences Graduate Program Workgroup
Executive Sponsors	Norman Drinkwater, Interim Vice Chancellor for Research and Graduate Education William J. Karpus, Dean of the Graduate School Cynthia Czajkowski, Associate Vice Chancellor for the Biological Sciences
Primary Stakeholders	University of Wisconsin-Madison Biological Sciences faculty, staff and graduate students
Project Description/Statement of Work	
The purpose of this workgroup is to review the current state of Biological Sciences PhD programs at the University of Wisconsin-Madison and to make recommendations with respect to organizational structure, delivery of 21 st century graduate education and program and PhD student funding. The workgroup will engage with biological science PhD programs, faculty, staff and students over the course of six months to gain insight into the UW-Madison Biological Science graduate program enterprise, identify strengths and weaknesses in organizational and operational structure and make recommendations for solutions.	
Business Case / Statement of Need	
UW-Madison has 35 Biological Sciences PhD programs in 8 Schools/Colleges. The administrative structures, funding models and educational philosophy varies widely across the constellation of PhD programs. In January 2019 Drs. Catherine Fox and Christina Hull presented the Graduate School and the Office of the Vice Chancellor for Research and Graduate Education with a letter, signed by numerous Biological Sciences faculty members, outlining a need to examine how graduate education is delivered and administered at UW-Madison. Although each program is required to be reviewed every 10 years, there is no coordinated effort to examine the overall organizational operational structure of Biological Sciences PhD programs. Given that the request for this examination came from the faculty and the National Academies of Science, Engineering and Medicine released a report on “Graduate STEM Education for the 21 st Century” in 2018, we believe there is a local need to examine our structures and processes as a vibrant and modern PhD training enterprise is critical to the research and educational missions of the University.	
Implementation Plan / Milestones <i>(Due dates and durations)</i>	
Workgroup convenes: The kickoff meeting on May 7, 2019 will charge the workgroup, outline expectations and set the timeline for which deliverables will be made. Tools such as Box Folder access and email list serve will be introduced to aid in the performance of the project.	
Mid-point check-in: August 2019 . The workgroup will deliver a memo to the executive sponsors indicating midpoint progress.	
Workgroup completes its charge and dissolves by: November 1, 2019 at which point a report indicating the strengths and weaknesses of the current state of organization and operations of Biological Sciences PhD programs along with recommendations for change that address areas of concern.	
Change Management/Issue Management <i>(How decisions will be made? How changes will be made?)</i>	
The workgroup will use a consensus process – a participatory model of decision making that reflects multiple perspectives and that could result in a unanimous decision (100% agreement), agreement by a supermajority (2/3 or more agree), or agreement by a simple majority (more than half agree). To assure a respectful majority, the team commits to explore and record concerns that	

Office of the Dean

graduateschooldean@grad.wisc.edu • (608) 263-1353 • fax (608) 265-9505

are raised, and to document the degree of agreement for decisions reached. The recommendations will be made to the executive sponsors who will then engage campus leadership (deans of the participating Schools/Colleges as well as senior University leadership) in a second step of consultation and engagement to effect changes that will position UW-Madison to attract and educate the best PhD students in the Biological Sciences.

Project Team Roles and Responsibilities

Team Members	Roles	Responsibilities
David Eide	Nutritional Sciences Department Chair and DGS	Workgroup Member
Zsuzsana Fabry	Cell and Molecular Pathology DGS	Workgroup Member
Catherine Fox	Department of Biomolecular Chemistry	Workgroup Member
Mary Halloran	Neuroscience DGS	Workgroup Member
Edward Jackson	Medical Physics Department Chair and DGS	Workgroup Member
James Keck	School of Medicine and Public Health Associate Dean for Basic Sciences	Workgroup Member
Ivan Rayment	Integrated Program in Biochemistry DGS	Workgroup Member
Garret Suen	Microbiology Doctoral Training Program DGS	Workgroup Member
David Wassarman	Cell and Molecular Biology program chair and DGS	Committee Member
Deneen Wellik	Department of Cell and Regenerative Biology Chair	Workgroup Chair

Biosciences
Faculty Letter of
Concern

To: Norman Drinkwater, Interim Vice Chancellor for Research and Graduate Education;
William Karpus, Dean of the Graduate School

From: Catherine Fox and Christina Hull, Professors of Biomolecular Chemistry, and co-signatories

RE: Future of graduate education and research in the biosciences at UW-Madison

Cc: Steve Ackerman, Associate Vice Chancellor for Research in the Physical Sciences;
Cynthia Czajkowski, Associate Vice Chancellor for Research in the Biological Sciences;
Robert Golden, Dean of the School of Medicine and Public Health;
James Keck, Associate Dean for Basic Sciences, School for Medicine and Public Health;
Mark Markel, Dean of the School of Veterinary Medicine;
Rick Moss, Senior Associate Dean for Basic Research, Biotechnology, and Graduate Studies;
Karl John Scholz, Dean of the College of Letters and Science;
Steve Swanson, Dean of the School of Pharmacy;
Kathryn VandenBosch, Dean of the College of Agricultural Sciences

We submit this letter to voice our strong concern about the future of Ph.D. training and research in the biosciences at UW-Madison. We are proud that bioscience Ph.D. excellence has been the cornerstone of research success at UW-Madison; one that supports faculty research programs and makes discoveries that benefit society and enable breakthroughs that support the Wisconsin Idea. Our research also leads to patents and licenses, and forms the basis of start-ups and other economic activity for the State and the country. After graduation our Ph.D. students become leaders in academia, industry, government, and non-governmental organizations, enhancing the visibility and stature of UW-Madison across the globe.

It is our opinion that new initiatives at the campus level for the recruitment and financial support of Ph.D. students and programs are needed to ensure our future preeminence in this crucial area. We request that you assemble a cross-campus working group of leaders in bioscience Ph.D. education and charge them with developing new models for holistically supporting bioscience Ph.D. programs and students to ensure viability of our research enterprise.

In a period of keen competition for Ph.D. students and research support, our peer institutions are increasing administrative and direct financial support for bioscience Ph.D. programs and fellowships. For example, at the University of Michigan, substantial fellowships are available to incoming Ph.D. students in their [Program in Biomedical Sciences](#). At the University of North Carolina, a multimillion dollar annual investment in bioscience Ph.D. student recruitment and training since 2008 correlates with a rise in their rankings from 27th in total federal research support to 11th in 2017.

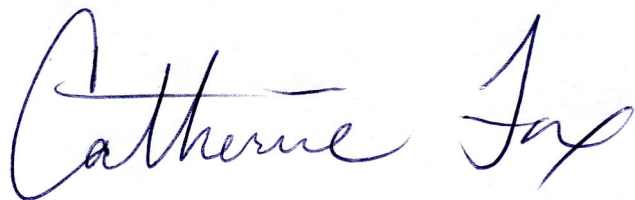

Our peer institutions are investing in their Ph.D. programs because they realize that supplemented support of bioscience Ph.D. training has a substantial multiplier effect on the value of individual laboratory research grants (e.g., NIH R01s, NSF RPGs). This multiplier effect increases research productivity and competitiveness for renewal and new research grants. Historically, UW-Madison's preeminence in bioscience research and graduate education has been supported remarkably well by the large number of Training Grant funded Ph.D. students, allowing us to compete nationally for the best students. However, the times are changing, and NIH training grant support for Ph.D. students has dropped precipitously at UW-Madison (Figure 1). Therefore, the multiplier effect that has fueled UW-Madison's premiere position is disappearing, and new solutions are needed.

In summary, we respectfully submit that now is the time to reverse these downward trends in bioscience Ph.D. training at UW-Madison. It is also our view that structural changes in how we attract, support, and train bioscience Ph.D. students are needed for UW-Madison to continue its world-renowned position as a leader in Ph.D. student training and research. Success in this endeavor will help position our institution to grow its research budget because our Ph.D. students are so integral to our research enterprise and our ability to attract the best bioscience faculty. In addition, it will allow the State to reap the economic and intellectual benefits of future biomedical, agricultural, biotechnology, and environmental advances.

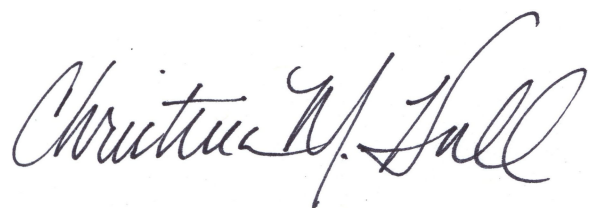

We await your leadership in formation of this working group, which should begin meeting in early 2019 with

the goal of formulating a plan of action prior to the 2019-20 admissions and recruiting season. We welcome your input on developing its charge.

Sincerely,

A handwritten signature in blue ink that reads "Catherine Fox". The script is fluid and cursive.

Catherine A. Fox,
Professor of Biomolecular Chemistry,
Former steering committee member of the Molecular Biosciences Training Grant

A handwritten signature in black ink that reads "Christina M. Hull". The script is fluid and cursive.

Christina M. Hull,
Professor of Biomolecular Chemistry and Medical Microbiology & Immunology,
Director, Molecular Biosciences Training Grant Program

Additionally, selected comments are presented at the end of this letter.

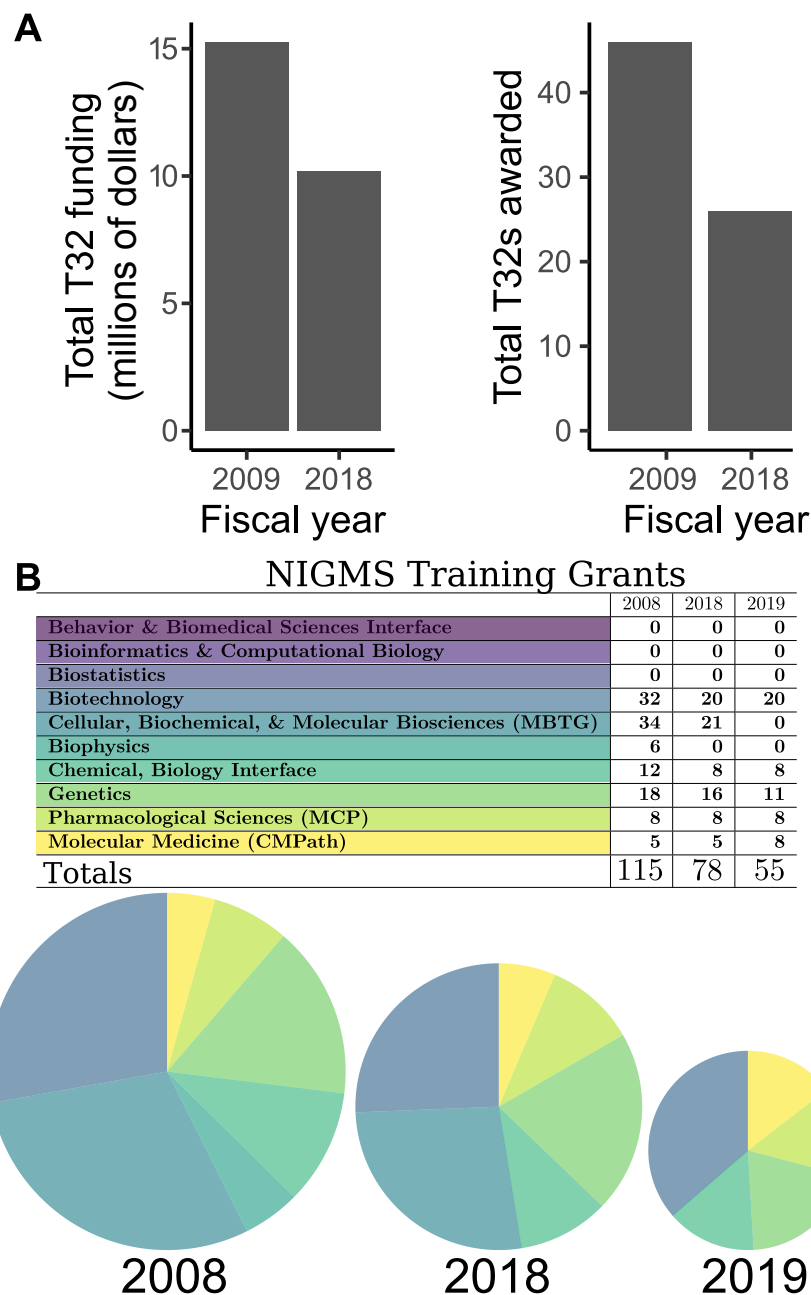

Figure 1: **Precipitous reductions in NIGMS Training Grant (T32) support for Ph.D. students at UW-Madison.** (A) Total NIH Training Grant (T32) support in millions of dollars (left) or number of T32s awarded (right) during the indicated years. (B) Table: Available T32s within NIGMS, the research institute that supports the majority of T32s and that contains the three major T32s that have supported Bioscience Ph.D. students at UW-Madison (i.e. BTP, MBTG and Genetics). The values indicate the number of Ph.D. trainees that could be supported by the indicated training grant in the indicated year. Numbers shown for 2019 represent optimistic projections based on current information about recently submitted or reviewed T32s. Pie Charts: The size of each circle represents the relative number of Ph.D. trainees that could be supported by NIGMS T32s per year for the indicated year. The sectors are colored according to the Table to indicate the relative contribution of individual T32s listed in the Table.

Selected Comments from Signatories

Strong graduate training is the key to UW-Madison's research success.

-*Laura Knoll*, Professor, SMPH

I, too, believe UW-Madison is at a critical juncture in determining how we will compete for the best students and attract them to our programs.

-*Audrey Gasch*, Professor, CALS

Because of the difficulty in getting post-docs into the Midwest, our reliance on these graduate students is great.

-*Darcie Moore*, Assistant Professor, SMPH

This is an extremely important issue to maintain high quality research at UW-Madison.

-*Kristen Bernard*, Professor, SVM

As a junior faculty member, I feel this letter well represents our concerns about bioscience Ph.D. training in the future.

-*Lixin Rui*, Assistant Professor, SMPH

From the perspective of a T32 Director, maintaining these programs involves increasing programmatic requirements to remain nationally competitive (even for non-NIGMS programs), to the point where the time involved for both directors and trainers to run a unique and meaningful program for trainees is becoming prohibitive. Consequently fewer people want to be involved. Additionally, I have been directly told that universities like Penn State provide substantial numbers of trainee positions to enhance the competitiveness of their T32s. Grassroots efforts from faculty are key but will not be sufficient to defend our remaining T32s much less expand the number towards where it used to be.

-*Rick Eisenstein*, Professor, CALS

Bolterstein	Elyse	Molecular and Environmental Toxicology	12/24/10	Faculty	Assistant Professor of Biology	Northeastern Illinois University
Brody	Matthew	Molecular and Environmental Toxicology	08/25/13	Faculty	Assistant Professor of Pharmacology	University of Michigan

Caldwell	Jane	Biophysics	05/17/98	Faculty	Clinical Assistant Professor, Nonmajors General Biology Program Coordinator	West Virginia University, Morgantown WV
Caldwell	Jane	Biophysics	05/17/98	Faculty	Clinical Assistant Professor, Nonmajors General Biology Program Coordinator	West Virginia University, Morgantown WV
Calkins	Marcus	Molecular and Environmental Toxicology	12/21/08	Faculty		National Cheng Kung University
Cavieres	Maria	Environmental Toxicology	08/26/01	Faculty	Professor	Universidad de Valparaiso (Chile)
Chae	Young Kee	Biophysics	08/24/98	Faculty	Professor	Sejohng University, Seoul Korea
Chae	Young Kee	Biophysics	08/24/98	Faculty	Professor	Sejohng University, Seoul Korea
Chen	Chen-Peng	Environmental Toxicology	05/16/99	Faculty	Associate Professor, Occupational Safety and Health	China Medical University
Clarke	Stephen	Nutritional Sciences	12/23/04	Faculty	Professor and Chair of Nutrition	Oklahoma State
Coller	Jeff	Cellular and Molecular Biology	05/21/00	Faculty	Director for RNA Molecular Biology	Center for RNA Science & Therapeutics
Colson	Brett	Physiology	12/24/09	Faculty	Assistant Professor of Physiology	University of Arizona Medical School
Conklin	Suzanne	Environmental Toxicology	08/22/99	Faculty	Assistant Professor	Rhode Island University
Conway	Laura	Biochemistry	12/23/89	Faculty	Professor and Assistant Director, Genetic Counseling	Arcadia University
Culumber	Michele	Environmental Toxicology	05/19/02	Faculty	Assistant Professor of Microbiology	Weber State University
Diener	Lynn	Molecular and Environmental Toxicology	08/21/05	Faculty	Associate Professor, Biological Sciences	Mount Mary University
Eddinger	Thomas	Meat and Animal Science	08/26/84	Faculty	Professor of Biology, Marquette University	Marquette University
Edison	Arthur	Biophysics	08/22/93	Faculty	Professor, Dept of Biochemistry and Molecular Biology,	Dept of Genetics and the Complex Carbohydrate Research Center
Ellinger	James	Biochemistry	08/26/12	Faculty	Adjunct Professor	Tokyo University
Erbilgin	Nadir	Entomology	08/26/01	Faculty	Professor, Dept of Renewable Resources	University of Alberta
Forrester	Wayne	Biochemistry	08/22/93	Faculty	Associate Research Professor of Medical Genetics	Indiana University of Bloomington
Fox	Catherine	Biochemistry	05/17/92	Faculty	Professor, Biomolecular Chemistry	UW Madison
Fuery	Anna	Biochemistry	12/24/09	Faculty	Clinical Biochemist and Professor	Alberta Health Services, University of Alberta, Canada
Gaugler	Randy	Entomology	12/23/78	Faculty	Distinguished Professor	Rutgers
Gestwicki	Jason	Biochemistry	05/19/02	Faculty	Associate Professor, Dept. Pharmaceutical Chemistry	UCSF
Gillian-Daniel	Don	Biochemistry	05/18/97	Faculty	Associate Director, DELTA Program	UW Madison
Goldstrohm	Aaron	NO INFO		Faculty	Associate Professor: Director of Graduate Studies, BMBB Graduate Program	University of Minnesota
Gray	Nicola	NO INFO		Faculty	Professor	University of Edinburgh
Gutzman	Jennifer	Molecular and Environmental Toxicology	05/16/04	Faculty	Associate Professor, Biological Sciences	University of Wisconsin-Milwaukee
Hegg	Colleen	Environmental Toxicology	08/25/96	Faculty	Professor of Pharmacology & Toxicology	Michigan State University
Hinck	Andrew	Biochemistry	05/16/93	Faculty	Professor, Department of Structural Biology	University of Pittsburgh
Hinck	Andrew	Biochemistry	05/16/93	Faculty	Professor, Department of Structural Biology	University of Pittsburgh
Hundley	Heather	Biomolecular Chemistry	05/15/05	Faculty	Associate Professor of Biochemistry and Molecular Biology	Indiana University
Huss	Janice	Environmental Toxicology	05/16/99	Faculty	Associate Professor of Molecular & Cellular Endocrinology	City of Hope
Hutchison	Bill	Entomology	05/20/84	Faculty	Professor and Extension Entomologist	University of Minnesota
Johnson	Jeffrey	Environmental Toxicology	08/23/92	Faculty	Professor of Pharmacy	University of Wisconsin-Madison
Johnson	Mary Ann	Nutritional Sciences	12/18/83	Faculty	Professor and Chair of Foods and Nutrition, University of Georgia and former President of the American Society for Nutrition	Retired
Johnson	Reid	Molecular Biology	08/21/83	Faculty	Professor, Biological Chemistry	UCLA
Jorgensen	Richard	Biochemistry	12/23/78	Faculty	Professor, Investigator	LANGEBIO (Laboratorio Nacional de Genomica para la Biodiversidad)
Kim	Aekyong	Molecular and Environmental Toxicology	12/23/04	Faculty	Professor of Pharmacy	Catholic University
Kragtorp	Katherine	Molecular and Environmental Toxicology	08/23/03	Faculty	Science Instructor	Minneapolis Community & Technical College
Krezel	Andrzej	Biochemistry	12/22/91	Faculty	Research Assistant Professor, Biochemistry and Molecular Biophysics	Washington University in St. Louis
Kuloglu (Elgin)	Emine Sonay	Biochemistry	08/25/02	Faculty	Assistant Professor, Dept of Chemistry	Mugla University, Turkey
Kurian	Joseph	Molecular and Environmental Toxicology	08/27/06	Faculty	Assistant Professor, Medical Microbiology, Immunology, and Cell Biology	Southern Illinois University
Lambert	Paul	Biochemistry	05/19/85	Faculty	Professor and Director of McArdle Laboratory for Cancer Research	UW Madison Genetics
Lambrecht	Richard	Environmental Toxicology	08/24/86	Faculty	Instructor / Lab Manager	UMass Medical School
Lee	Jong-Min	Molecular and Environmental Toxicology	08/24/03	Faculty	Assistant Professor of Neurology	Harvard Medical School
Levin	Edward	Environmental Toxicology	12/23/84	Faculty	Professor of Psychiatry & Behavioral Sciences	Duke University
Lewis	Ian	Biochemistry	05/16/10	Faculty	Assistant Professor, AIHS Transitional Health Chair, Department of Biological Sciences	University of Calgary, Calgary Alberta Canada
Lipinski	Robert	Molecular and Environmental Toxicology	05/18/08	Faculty	Associate Professor, Comparative Biosciences	University of Wisconsin-Madison
Liu	Biing-Hui	Environmental Toxicology	08/25/96	Faculty	Professor of Toxicology	National Taiwan University
Liu	Qinglian	Biomolecular Chemistry	12/22/02	Faculty	Associate Professor, Department of Physiology and Biophysics	Massey Cancer Center--Developmental Therapeutics Program School of Medicine
Loertscher	Jennifer	Biochemistry	08/26/01	Faculty	Professor of Chemistry	Seattle University
Loh	Stewart	Biochemistry	05/16/93	Faculty	Professor	Upstate Medical University, State University of New York, Syracuse NY
Lu	Zhe	Physiology	05/17/92	Faculty	Professor of Physiology and Investigator of the Howard Hughes Medical Institute	University of Pennsylvania, Perelman School of Medicine
Maquat	Lynne	Biochemistry	05/27/79	Faculty	Professor of Biochemistry and Biophysics, Member of National Academy	University of Rochester
Marcheschi	Ryan	Biochemistry	12/24/09	Faculty	Associate Professor	Northern Virginia Community College
Mouzakis	Kathryn	Biochemistry	05/19/13	Faculty	Assistant Professor, Dept of Chemistry and Biochemistry	Loyola Marymount University
O'Donnell	Sean	Entomology and Zoology	05/16/93	Faculty	Professor, Head of Department of Biology	Drexel University
Oberley	Matthew	Environmental Toxicology	12/21/03	Faculty	Assistant Professor of Clinical Pathology	Keck School of Medicine, University of Southern California
Oh	Byung	Biochemistry	08/27/89	Faculty	Professor, Dept of Biological Science	KAIST, Republic of Korea
Parajulee	Megha	Entomology	05/22/94	Faculty	Professor, Faculty Fellow	Texas A & M University
Park	Hee Soo	Molecular and Environmental Toxicology	08/25/13	Faculty	Assistant Professor, Molecular Genetics & Microbiology	Kyungpook National University
Peckarsky	Bobbi	Zoology	05/27/79	Faculty	Adjunct Professor Entomology	UW Madison
Peterson	Martha	Biochemistry	08/26/84	Faculty	Professor	University of Kentucky School of Medicine
Postle	Kathleen	Biochemistry	12/23/78	Faculty	Professor of Biochemistry and Biophysics	Penn State University
Prehoda	Kenneth	Biochemistry	05/18/97	Faculty	Professor,	University of Oregon, Institute of Molecular Biology
Reiter	Nicholas	Biochemistry	12/23/06	Faculty	Assistant Professor	Marquette University Klingler School of Arts and Science
Rieske-Kinney	Lynn	Entomology	05/21/95	Faculty	Professor	University of Kentucky
Roman	Beth	Environmental Toxicology	12/21/97	Faculty	Associate Professor, Human Genetics	University of Pittsburgh
Rouhana	Labib	Genetics	12/22/07	Faculty	Assistant Professor	Wright State University

Sashital	Dipali	Biochemistry	12/23/06	Faculty	Associate Professor, Department of Biochemistry, Biophysics and Molecular Biology	Iowa State University
Schantz	Susan	Environmental Toxicology	05/19/85	Faculty	Professor of Comparative Biosciences	University of Illinois at Urbana-Champaign
Schwartz	Steven	Environmental Toxicology and Food Science	12/19/82	Faculty	Professor, Food Science & Technology	The Ohio State University
Shanle	Erin	Molecular and Environmental Toxicology	08/25/13	Faculty	Assistant Professor of Biology	Longwood University
Sheets	Mike	Molecular Biology	12/23/89	Faculty	Professor, Biomolecular Chemistry	UW Madison
Slavin	JoAnne	Nutritional Sciences	08/23/81	Faculty	Professor of Food Science and Nutrition	University of Minnesota
Stilwell	Geoffrey	Environmental Toxicology	12/21/97	Faculty	Assistant Professor of Biology	Rhode Island College
Strang	Kevin	Physiology	08/28/94	Faculty	Distinguished Lecturer in Physiology, University of Wisconsin School of Medicine and Public Health	UW Madison
Surh	Young-Joon	Environmental Toxicology	05/20/90	Faculty	Professor of Pharmacy	Seoul National University
Sweitzer	Nancy	Physiology	05/16/93	Faculty	Professor and Head of Cardiovascular Medicine, Director of Sarnoff Cardiovascular Research Center, University of Arizona Medical School	University of Arizona
Thompson	Sunnie	Biochemistry	05/17/98	Faculty	Associate Professor Microbiology	University of Alabama School of Medicine
Thompson	Todd	Environmental Toxicology	05/18/97	Faculty	Associate Professor, Pharmaceutical Sciences	University of New Mexico
Thorne	Peter	Environmental Toxicology	08/26/84	Faculty	Professor of Occupational & Environmental Health	University of Iowa
Vanden Heuvel	John (Jack)	Environmental Toxicology	12/21/91	Faculty	Professor of Molecular Toxicology	Penn State University
Vravick	Anne	Toxicology	12/21/97	Faculty	Assistant Professor, Food Science	Mount Mary University
Walgenbach	Jim	Entomology	12/23/84	Faculty	Professor of Entomology	North Carolina State University
Walker	Mary	Environmental Toxicology	08/25/91	Faculty	Professor, Pharmacology & Toxicology	University of New Mexico
Wallin	Kimberly	Entomology	08/26/01	Faculty	Research associate professor and director of graduate programs	University of Vermont
Wang	Bingcheng	Environmental Toxicology	05/19/91	Faculty	Professor of Pharmacology	Case Western Reserve University
Weglarz	Teresa	Environmental Toxicology	12/23/00	Faculty	Associate Professor of Biological Sciences	University of Wisconsin-Fox Valley
Yin	Jerry	Molecular Biology	12/21/86	Faculty	Professor	UW Madison Genetics
Yu	Min	Molecular and Environmental Toxicology	12/24/10	Faculty	Assistant Professor of Clinical Chemistry	University of Kentucky
Zarkower	Dave	Molecular Biology	05/21/89	Faculty	Professor, Director--Developmental Biology Center	University of Minnesota
Zhao	Yun	Molecular and Environmental Toxicology	08/25/13	Faculty	Statistics Teaching Aide	University of Illinois-Chicago
Abnet	Christian	Environmental Toxicology	08/23/98	Government	Senior Investigator	NCI
Antkiewicz	Dagmara	Molecular and Environmental Toxicology	12/22/07	Government	Environmental Toxicologist	Wisconsin State Lab of Hygiene
Brown	Cherry	Molecular and Environmental Toxicology	08/26/18	Government	Forensic Scientist	City of New York
Cholewa	Brian	Molecular and Environmental Toxicology	12/21/14	Government	Toxicologist	FDA
Coriano	Carlos	Molecular and Environmental Toxicology	05/13/17	Government	Postdoctoral Fellow	Department of Defense
Davis	Cindy D.	Nutritional Sciences	12/22/91	Government	Director of Grants and Extramural Activities	NIH Office of Dietary Supplements
Diaz	Carol	Molecular and Environmental Toxicology	08/27/17	Government	Postdoctoral Fellow	Department of Defense
Eldridge	Sandra	Environmental Toxicology	12/23/88	Government	Senior Scientist / Toxicologist	National Cancer Institute
Garcia	Liz	Molecular and Environmental Toxicology	08/25/19	Government	Postdoctoral Fellow	NIH
Gunnarsdottir	Sjofn	Molecular and Environmental Toxicology	12/22/02	Government	Policy Advisor	Dutch National Institute for Public Health & Environment (RIVM)
Gustavson	Karl	Environmental Toxicology	05/20/01	Government	Contaminated Sediments Lead	US Environmental Protection Agency
Hemming	Jocelyn	Environmental Toxicology	05/17/98	Government	Senior Scientist	Wisconsin State Lab of Hygiene
Irving	Roy	Molecular and Environmental Toxicology	12/23/12	Government	Section Chief	Wisconsin Department of Health Services
Johnson	Mark	Oncology and Environmental Toxicology	08/20/84	Government	Regional 5 Director	US Environmental Protection Agency
Lohman	Danielle	Biochemistry	12/24/17	Government	AAAS Science and Technology Fellow, US Department of State	US Dept of State
Lorch	Jeffrey	Molecular and Environmental Toxicology	08/26/12	Government	Microbiologist	USGS
Osterweil (Lee)	Elyse	Molecular and Environmental Toxicology	12/23/05	Government	Toxicologist	US Environmental Protection Agency
Pham	Ly	Molecular and Environmental Toxicology	05/18/14	Government	ORISE Postdoctoral Fellow, National Center for Computational Toxicology	US Environmental Protection Agency
Sargent	Linda	Environmental Toxicology	05/19/91	Government	Research Toxicologist	National Institute for Occupational Safety & Health
Teegarden	Justin	Environmental Toxicology	05/16/99	Government	Scientist, Chemical Biology & Exposure Science Team	Pacific Northwest National Laboratory
Thiboldeaux	Robert	Environmental Toxicology	12/22/96	Government	Toxicologist	Wisconsin Department of Health Services
Yang	Sarah	Molecular and Environmental Toxicology	12/22/13	Government	Environmental Toxicologist	Wisconsin Department of Health & Family Services
Zhao	Dong	Environmental Toxicology	08/25/02	Government	Toxicologist	FDA
Agnew	Daniel	Chemical Engineering	05/19/13	Industry	Patent Agent	Roche Sequencing Solutions
Albert	Thomas	Environmental Toxicology	08/27/00	Industry	Vice President, Global Head of Research	Roche Sequencing Solutions

Ariazi	Jennifer	Molecular and Environmental Toxicology	05/18/03	Industry	? Investigator	? GlaxoSmithKline
Arnold	Scott	Environmental Toxicology	08/27/95	Industry	Product Sustainability Consulting Leader	Dow Chemical Company
Baca (LeGendre)	Jacqueline	Cellular and Molecular Biology	05/20/12	Industry	Biotechnology Professional	San Francisco Bay Area
Bae	JuYun	Molecular and Environmental Toxicology	12/21/08	Industry	Field Application Scientist	Life Technologies
Bahrami	Arash	Biophysics	05/17/09	Industry	Senior Scientist	NetSeer, San Francisco Bay Area
Barkoff	Aaron	Biochemistry	08/22/99	Industry	Patent Attorney, Shareholder	McAndrews, Held, and Malloy Ltd.
Bialk	Heidi	Molecular and Environmental Toxicology	05/16/06	Industry	Senior Director of Global Scientific Affairs	PepsiCo
Blommel	Paul	Biophysics	08/26/07	Industry	Independent consultant	TTC Labs Consulting
Brake	Paul	Environmental Toxicology	05/17/98	Industry	Senior Solution Scientist	Sema4
Brinkman	Ashley	Molecular and Environmental Toxicology	12/24/15	Industry	Senior Associate Toxicologist	SC Johnson
Bultman	JoAnna	Molecular and Environmental Toxicology	08/22/10	Industry	Assistant Director	Charles River Laboratories
Bunger	Maureen	Environmental Toxicology	05/20/01	Industry	Product Manager	ADME Tox Solutions (Lonza)
Burke	Jordan	Biochemistry	12/23/12	Industry	Scientist II	Guardant Health, San Francisco
Burns	Felipe	Molecular and Environmental Toxicology	05/17/15	Industry	Senior Scientist	Avista Pharma Solutions Inc
Carney	Sara	Molecular and Environmental Toxicology	12/23/05	Industry	Director of Product Safety	Kimberly-Clark
Chesney	Alexandra	Molecular and Environmental Toxicology	05/15/16	Industry	Study Director	Covance
Choe	Soheui	Biochemistry	08/24/97	Industry	Associate	Millbank, Tweed, Hadley & McCloy LLP Washington DC Metro Area
Chrilton	Jacqueline	Genetics	05/15/11	Industry	Manager of Reports and Metrics	Pharmacy OneSource, Madison WI
Cimafranca	Melissa	Molecular and Environmental Toxicology	05/14/06	Industry	Medical Laboratory Scientist	Atlantic Health Systems
Daggett	Daniel	Environmental Toxicology	08/24/97	Industry	Executive Director of Sustainability	Diversey
Dahl	Erica	Environmental Toxicology	08/25/02	Industry	Senior Toxicologist	SafeBridge Consultants
Dai	Ziqi	Biophysics	12/23/12	Industry	Epic	Epic
Dai	Ziqi	Biophysics	12/23/12	Industry	Epic	Epic
Davis	Jared	Biochemistry	08/26/07	Industry	Director of Synthetic Process Development	Alexion Pharmaceuticals
DeAbrew	K. Nadira	Molecular and Environmental Toxicology	12/22/07	Industry	Senior Scientist / Toxicologist	Procter & Gamble
Desotelle	Joshua	Molecular and Environmental Toxicology	08/28/11	Industry	Study Director	Covance
Dever	Joseph	Molecular and Environmental Toxicology	12/21/08	Industry	Senior Toxicologist	Amway
DiBartolomeis, Jr	Michael	Environmental Toxicology	08/26/84	Industry	Principal	Toxicology Research International
Dickson	Kris	Biochemistry	05/17/98	Industry	Freelance Science Writer and Editor	
DiNicola	Natalie	Environmental Toxicology	08/27/95	Industry	President	DiNicola LLC
Duddy	Steven	Environmental Toxicology	08/23/87	Industry	Chief Science Officer	Integrated Nonclinical Development Solutions INC
Falero-Perez	Juliana	NO INFO	08/20/019	Industry	Scientist	ThermoFischer
Galvan	Noe	Molecular and Environmental Toxicology	08/22/04	Industry	Senior Director of QA	Beachbody
Green	Larry	Molecular Biology	08/23/87	Industry	Chief Executive Officer at Ablexis, LLC and AlivaMab Discovery Services, LLC	Ablexis
Green	Roland	Environmental Toxicology	12/23/99	Industry	Founder of Nimblegen, now CEO of Invenra	Invenra
Green	Roland	Environmental Toxicology	12/23/99	Industry	CEO & Co-Founder	Invenra
Hanlon	Paul	Molecular and Environmental Toxicology	08/24/03	Industry	Toxicologist	Abbott Nutrition
Heidel	Shawn	Environmental Toxicology	05/16/99	Industry	Veep & Global Head of Safety Assessment, Metabolism, and Lead Optimization	Covance
Herman	James	Environmental Toxicology	08/28/88	Industry	Partner & President	Integrated Nonclinical Development Solutions INC
Hook	Brad	Biochemistry	05/14/06	Industry	Senior Applications Scientist	Promega Corporation
Hui	Julia	Environmental Toxicology	12/28/84	Industry	Executive Director	Celgene
Hutchinson	John	Molecular and Environmental Toxicology	05/20/12	Industry	Toxicologist	3M
Jankowski	Mark	Molecular and Environmental Toxicology	05/22/07	Industry	Ecotoxicologist	US Environmental Protection Agency
Jones	Frank	Environmental Toxicology	05/17/87	Industry	Principal Toxicologist	SC Johnson
Kim	Jin Hae	Biophysics	08/28/11	Industry	Senior Scientist	Samsung Advanced Institute of Technology, Republic of Korea
Kim	Tae Won	Molecular and Environmental Toxicology	12/24/16	Industry	Senior Research Scientist	Dongwha Pharma
Koh	Yvonne	Microbiology	12/24/11	Industry	Scientific Officer	The BioFactory Pte, Ltd, Singapore
Kukorowski	Ken	Entomology	08/23/81	Industry	Senior Principal Scientist and Manager	Bayer Crop Science
Laszewski	Steven	Environmental Toxicology	05/21/89	Industry	Senior Veep Environment	Foth Infrastructure & Enviroment LLC
Lebakken	Connie	Cellular and Molecular Biology	05/18/97	Industry	President and COO	StemPharm
Li	Guangming	Molecular and Environmental Toxicology	08/22/04	Industry	Toxicologist	Novartis / Alcon
Luitjens	Cameron	Biochemistry	12/23/00	Industry	Patent Attorney, Patent Product Specialist	Thompson Reuters, Minneapolis
Mahnke	Lisa	Biochemistry	08/23/98	Industry	Head of Clinical Development	Dragonfly Therapeutics, Inc.

Malone	Thomas	Molecular and Environmental Toxicology	05/20/07	Industry	Veep of R&D	Hygeia Industries
Mehta	Vatsal	Molecular and Environmental Toxicology	12/24/09	Industry	Senior Scientist / Toxicologist	Procter & Gamble
Mejia	Jackie	Environmental Chemistry and Technology	12/24/17	Industry		Pathogenomica
Mickelson	Barbara	Nutritional Sciences	05/20/01	Industry	Manager of Technical Services	Envigo/Teklad
Miller	Elizabeth (Liz)	Human Cancer Biology	08/25/19	Industry	Scientist	San Francisco Estuary Institute
Miller	Robert	Nutritional Sciences	08/24/86	Industry	President of Nutrition	Kaleido Biosciences
Morgan	Molly	Molecular and Environmental Toxicology	05/12/19	Industry	Postdoctoral Fellow	Univeristy of California-San Diego
Muhlenbeck	Jessica	Molecular and Environmental Toxicology	12/23/18	Industry	Toxicologist	Kimberley Clark
Neveu	Mark	Environmental Toxicology	08/22/93	Industry	CEO & Pharma Innovator	Wellomics LLC
Newman	Jack	Bacteriology	08/26/01	Industry	Co-founder and Chief Science Officer	Amyris
Nguyen (Wynder)	Jalissa	Molecular and Environmental Toxicology	05/13/18	Industry	Toxicologist (Consumer Safety)	RB (New York)
Novick	Rachel	Molecular and Environmental Toxicology	05/16/10	Industry	Senior Health Scientist	Cardno ChemRisk
Nuwaysir	Emile	Environmental Toxicology	08/24/97	Industry	President & CEO	BlueRock Therapeutics
Olson	John	Biochemistry	12/23/95	Industry	Author	
Opperman	Laura	Cellular and Molecular Biology	05/18/08	Industry	Patent Scientist	Michael Best 7 Friedrich, LLP
Palenski	Tammy	Molecular and Environmental Toxicology	08/25/13	Industry	Associate Clinical Scientist	AbbVie
Peltz	Stuart	Oncology	12/23/89	Industry	Chief Executive Officer at	PTC THERAPEUTICS INC
Prasch-Landreman	Amy	Molecular and Environmental Toxicology	08/22/04	Industry	Global Product Manager	Promega
Pulak	Rock	Genetics	12/23/92	Industry	Global Director of Life Sciences	Union Biometrica, Holliston, MA
Puthenveettil	Jairaj	Environmental Toxicology	05/16/99	Industry	Associate Director, Oncology Health Systems	Bristol-Myers Squibb
Reiter	Robert	Plant Breeding and Plant Genetics	12/23/89	Industry	Head of Research and Development, Crop Science	Bayer Global
Ripp	Sharon	Environmental Toxicology	12/23/98	Industry	Director of Preclinical Development	Pfizer
Rose	Peter	Environmental Toxicology	12/23/00	Industry	Advanced Regulatory Specialist	Pace Analytical
Rufer	Echoleah	Molecular and Environmental Toxicology	08/22/10	Industry	Principal Toxicologist	Apple
Sachsenmeier	Kris	Environmental Toxicology	12/22/96	Industry	Associate Director of Translational Sciences	AstraZeneca
Sadek	Christine	Environmental Toxicology	08/27/95	Industry	Acting Operations & Technical Manager	3M
Sand	Jordan	Molecular and Environmental Toxicology	05/16/10	Industry	CTO	Ab E Discovery
Sausen	Peter	Environmental Toxicology	08/23/92	Industry	Veep & Head of Early Phase Development Solutions	Covance
Schmit	Travis	Molecular and Environmental Toxicology	05/16/10	Industry	Principal Scientist	PepsiCo
Seefeld	Mark	Environmental Toxicology	12/19/82	Industry	Veep, Preclinical Toxicology	Arrowhead Pharmaceuticals
Selzer	Rebecca	Environmental Toxicology	08/24/97	Industry	President & CEO	Roche NimbleGen
Shaffer	Clarissa	Molecular and Environmental Toxicology	05/18/14	Industry	Toxicology Specialist	3M
Sharer	Jane	Environmental Toxicology	12/23/93	Industry	Toxicologist, Drug Metabolism Unit, Pharmaceutical Division	3M
Shea	Michael	Molecular and Environmental Toxicology	08/27/17	Industry	Scientific Specialist	Covance
Sprague	Christopher	Molecular and Environmental Toxicology	08/22/04	Industry	Lead of PS Operations	AbbVie
Staple	David	Biochemistry	12/23/06	Industry	Attorney and Shareholder	Casimir Jones, Patent Trademark and Copyright Attorneys
Strong	Ashley	Molecular and Environmental Toxicology	12/24/15	Industry	Scientist of Molecular Biology & Technology Development	Exact Sciences
Stumpf	Craig	Cellular and Molecular Biology	05/18/08	Industry	Research Scientist	eFFECTOR Therapeutic, Inc, San Diego
Sutherland	Jessica (Jess)	Environmental Toxicology	12/21/97	Industry	Senior Director of Toxicology	Alnylam Pharmaceuticals
Tarapore	Rohinton	Molecular and Environmental Toxicology	08/22/10	Industry	Associate Director for Clinical Research	Oncoceutics Inc
Thackaberry	Evan	Environmental Toxicology	08/25/02	Industry	Veep, Head of Preclinal Development	Ra Pharmaceuticals
Tumas	Stephen	Biochemistry	08/28/11	Industry	Business Intelligence Developer	Epic
Valley	Cary	Cellular and Molec.	05/17/15	Industry	Scientist III	sanofi Genzyme, Waltham MA
Vasanthakumar	Aparna	Nutritional Sciences	12/22/07	Industry	Principal Research Scientist	AbbVie Inc
Velasco	Javier	Molecular and Environmental Toxicology	08/28/16	Industry	Toxicologist	Millennium Health
Verdeal	Kathey	Environmental Toxicology	05/23/82	Industry	Toxicologist	Toxicology Consulting Inc
Waghray	Shruti	Biochemistry	12/24/15	Industry	Postdoctoral Scientist	Ionis Pharmaceuticals, Carlsbad CA
Wang	Liao Teng	Biochemistry	08/25/02	Industry	Lawyer/ Founder	101Legal.com
Weinreich	Mike	Biochemistry	12/23/93	Industry	Program Director for the Genetic Mechanisms Cluster	NSF Division of Molecular and Cellular Biosciences

Wiecinski	Paige	Molecular and Environmental Toxicology	08/26/12 Industry	Senior Research Scientist	Altria
Wong	Letitia	Molecular and Environmental Toxicology	08/24/14 Industry	Senior Scientist	Chicago BioSolutions
Yue	Monica	Molecular and Environmental Toxicology	08/28/16 Industry	Technical Services Scientist	Promega
Zabel	Erik	Environmental Toxicology	12/23/95 Industry	Epidemiologist & Health Services Researcher	Stratis Health
Zhang	Beilin	Biochemistry	05/16/99 Industry	Project Leader	Sangamo Biosciences, California
Allgeier	Sarah	Molecular and Environmental Toxicology	12/22/07 Other	Radiologist	University of Michigan Hospitals
Beehler	Jeff	Entomology	08/26/90 Other	Staff	San Bernadino Water Conservation District
Bookland	Elizabeth	Environmental Toxicology	08/25/91 Other	Owner / Proprietor	Express Employment Professionals
Ganem	Leonardo	Environmental Toxicology	12/23/99 Other	COO	Santa Clara Communications Consultation Agency (Brazil)
Gayda	Debra	Environmental Toxicology	12/18/83 Other	Pharmaceutical Development Consultant	Gayda PHarmReg Consulting
Jung-Hynes	Brittney	Molecular and Environmental Toxicology	05/16/10 Other	Lab Development Specialist (Senior)	UW-Hospitals
Loretz	Linda	Environmental Toxicology	12/21/86 Other	Director, Safety & Regulatory Toxicology	Personal Care Products Council
Thompson	Cynthia	Environmental Toxicology	12/22/96 Other	Writer / Editor	CSRA Inc
Van Pay	Lisa	Molecular and Environmental Toxicology	08/27/06 Other	Director of Research Communications	George Washington University
Yuroff	Alice	Environmental Toxicology	05/19/02 Other	Regional Research Coordinator, Wisconsin Research and Education Network	University of Wisconsin-Madison

Appendix 6

Comparison of
Training Grant
History Relative
to Our Peers

Appendix 6

UW–Madison Training Grant Peer Comparison: Total Fiscal Year (FY) Costs and Number of Training Grants (TGs) from FY09-FY18

	FY 09		FY 10		FY 11		FY 12		FY 13		FY 14		FY 15		FY 16		FY 17		FY 18	
University	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs	Total FY Cost	# of TGs

Tables are based on NIH fiscal year (October 1-September 30) for all NIH training grants. Training grants that are in a no-competitive extension were omitted from the analysis. DHHS training grants excluded due to lack of data for FY09. Sources: NIH Reporter.

• **Diminishing financial impact of training grants at UW-Madison:** Over the past ten years, there has been a progressive reduction in the success of UW Madison NIH training grant renewals, which has resulted in a substantial loss in support for graduate students and postdoctoral fellows. In total, we have lost nearly \$2,700,000 in annual training grant (TG) support (15%) and 13 of our training grants (26%) since 2009. Notably, 2018 marked our lowest number of training grants on campus in a decade. The erosion of TG funds has also occurred as tuition and student and postdoc stipends have increased, meaning that the buying power of each training grant dollar has also reduced by inflation.

Tables are based on NIH fiscal year (October 1-September 30) for all NIH and DHHS training grants. Training grants that are in a no-competitive extension were omitted from the analysis. Sources: NIH Reporter, Health Resources & Services Administration search tool and WISER.
