& ASABE Activities!

Reminder: Is your check or money order included with this form?

On **Thursday, November 2nd through Saturday, November 4th** the **American Society of Agricultural and Biological Engineers (ASABE)** at **UW-Madison** will hold its annual lawn mower, snow blower, and roto-tiller clinic.

This clinic is designed to winterize and provide preventative maintenance for your machine before the upcoming season. **The cost of this service is \$45.00 per gas machine and \$30 per electric machine.** Additional options include a new spark plug (\$10 extra) and/or a new air filter (\$20 extra).

- Machines may be brought to the Agricultural Engineering Lab (SW corner of Elm and Observatory Drive) between **noon and 8:00 p.m. on Thursday, November 2nd or 8:00 am to 6:30 p.m. on Friday, November 3rd.**
- Your machine will be ready to be picked up Saturday between 8 a.m. and 12 p.m.
- Please respond promptly as this year we are **limiting the number of machines to 80 to ensure a high quality of service.**
- If you return a request and we cannot service your machine, we will contact you.
- For an additional charge (\$25 +\$15 for additional machines), machines will be picked up by us Thursday evening or Friday (all day) and will be returned Saturday. We will only be picking up within the designated area on the map at the end of this flier, so please make sure you are within this area if selecting this option. Additional information will be sent out to customers who choose this option.
- Sorry! We do not accept reel type mowers, garden tractors, or riding lawn mowers.
- Because this is a winterizing clinic, we are not prepared to repair equipment. Therefore, we can only accept machines that are currently operational.
- Please remove all side chutes and clipping bags before turning in your machine for service
- Enclosed are two copies of the form, feel free to share with neighbors and friends!

Questions may be directed to **John O'Neill**
