

I-Corps Learning Session

Summer 2024

WHAT IS NSF I-CORPS?

The NSF Innovation Corps. Funded by the National Science Foundation (NSF), the I-Corps™ program helps researchers quickly evaluate the commercial potential of a scientific discovery or technology that could lead to a path for startup success.

I-Corps has free programs for student, faculty, and staff, and we can explain that at the learning session participants will learn if I-Corps is the right match for them.

Attending a learning session can help you decide if the NSF I-Corps program is right for you. Past I-Corps participants will be on hand to answer questions and Bonnie Bachman, Director of the Technology Entrepreneurship Office (TEO), will provide an overview of the local, regional and national I-Corps programs. UW-Madison is one of the 16 universities that comprise the NSF I-Corps Great Lakes Region Hub. TEO is the official NSF Office for the UW-Madison I-Corps Program and the Gateway for all I-Corps activities. Please contact us regarding finding a mentor, training courses, application process, follow on funding, and anything related to I-Corps.

This event also provides an opportunity to explore:

The Engine Blueprint :This program is designed to give future Tough Tech leaders the chance to learn the entrepreneurial process.

The Activate Fellowship : This program transforms scientists and engineers into founders, empowering them to reinvent the world by bringing their research to market

Activate
